The image shows a screenshot of the Google Play Store interface. At the top, the Google Play logo is on the left, and a search bar contains the text 'capes' with a red arrow pointing to it from the right. Below the search bar, the word 'Pesquisa' is displayed, followed by 'Todos os resultados' and a dropdown arrow. A vertical navigation menu on the left lists categories: Loja (with a shopping bag icon), Apps (with an Android robot icon), Filmes (with a film strip icon), Música (with a headphones icon), Livros (with a book icon), and Banca (with a document icon). Below these are links for 'Minha atividade no Google Play', 'Minha lista de desejos', and 'Resgatar'. The main content area is titled 'Apps' and displays two app cards. The first card is for '.periodicos. Portal de Periódicos da' with a colorful striped icon and a red arrow pointing to it from the left. The second card is for 'Mobile Qualis LINC' with a blue icon featuring a crest, the letters 'M' and 'Q', and the text 'DADOS' and 'CAPES'. Both app cards show a 5-star rating and a green checkmark icon.

## global warming

Resumo/abstract: Giving voice to a growing conviction of most of the scientific community, the Intergovernmental Panel on Climate Change (IPCC) reported that the 20th century saw an increase in global average surface temperature of approximately 0.6 °C (1.1 °F). The IPCC went on to state that most of the warming observed over the second half of the 20th century could be attributed to human activities, and it predicted that by the end of the 21st century the average surface temperature would increase by another 1.8 to 4.0 °C (3.2 to 7.2 °F), depending on a range of possible scenarios. Many climate scientists agree that significant economic and ecological damage would result if global average temperatures rose by more than 2 °C [3.6 °F] in such a short time. Such damage might include increased extinction of many plant and animal species, shifts in patterns of agriculture, and rising sea levels. The IPCC reported that the global average sea level rose by some 17 cm (6.7 inches) during the 20th century, that sea levels rose faster in the second half of that century than in the first half, and that again depending on a wide
